BOARD OF PUBLIC WORKS

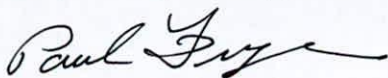

Dear Ms. Bose,

The Federal Energy Regulatory Commission has shown that the Dominion Cove Point LNG export project will not hurt the environment. As a citizen of Calvert County, I believe we should move past environmental concerns and take advantage of this opportunity for the sake of our financial health.

Cove Point will generate \$2.3 billion in sales revenue for county businesses all within the existing terminal foot print. Dominion's facility has operated at Cove Point for nearly 40 years, and has all the while proven its partnership with Calvert County. Needless to say, it has earned its reputation for environmental stewardship. The transformation of the facility has been thoroughly deliberated over the past two years in order to ensure our community's protection, but it is now time to wrap up the debate.

FERC has done its part to release your extensive Environmental Assessment on Dominion Cove Point's project. I support the project and would like to see it move forward without another second wasted.

Thank you for your support.
